

## The Art Students Second Grade Practical Geometry. Revised and Partly Re-Written by G. Brown

Filesize: 1.34 MB

### ***Reviews***

*It is just one of the most popular ebook. It usually fails to price an excessive amount of. You will not really feel monotony at any moment of your time (that's what catalogues are for about when you check with me).*

*(Matteo Torp)*

## THE ART STUDENTS SECOND GRADE PRACTICAL GEOMETRY. REVISED AND PARTLY RE-WRITTEN BY G. BROWN

To download **The Art Students Second Grade Practical Geometry. Revised and Partly Re-Written by G. Brown** eBook, you should refer to the web link listed below and save the ebook or gain access to other information which are related to THE ART STUDENTS SECOND GRADE PRACTICAL GEOMETRY. REVISED AND PARTLY RE-WRITTEN BY G. BROWN book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: . . . describe the semicircle Bed, and bisect the arc in E. Join D E. Draw D f perpendicular to A D, and equal to D E. Join A F. Then the square on A F1j square on A B. PROBLEM XI. --To describe a circle equal in area to Hie sum of two given circles. PROBLEM XII. --To describe a circle equal in area to the difference between two given circles. Take c E equal to the diameter of the greater circle, and on it describe the semicircle c f E. From c with c D (the diameter of the less circle) as radius, cut the semicircle in f. Join E F. Then E F is the diameter of the required circle. As in the last case any figure can be constructed equal in area to the difference between two similar figures. PROBLEM XIII. --To construct a triangle proportional in area to a given triangle. PEOBLEM XIV. --To construct a triangle proportional in area to a given triangle, and similar to it. PEOBLEM XV. --To construct a triangle having given the area and ratio of the sides. Area to 1 square inches: sides to be: 5: 6: 7. Take any straight line a b, and set off in it (567) equal parts, Bo that A C may be equal to five, c D to six, and D B to seven parts. Construct the triangle E C D, and find c F a mean proportional between its base...
