Chemical symbols and structures are the language of Chemistry. This is akin to what scientists say of Mathematics; that it is the language of science in symbolic forms. In this book, the author present Chemistry in a simple way, as a web of ideas and tries to remove some hidden barriers in order to reach proper understanding of some important concepts in the Subject; such concept like oxidation number, mole concept, IUPAC nomenclature, writing and balancing of chemical equations and many more. It can therefore be seen as a book of ideas; the strong and stimulating ideas which underlie Chemistry in this era when there is dwindling interest among students to study science, particularly Chemistry. All ideas in Chemistry are more practical than theoretical. Even when a chemical idea is presented in a theoretical way, the end result is in the laboratory where ideas are converted to reality. In the same way, the language of Chemistry in this book is the language of the laboratory. The dwindling fortune in the sciences in developing Countries is because less emphasis is laid on practical aspects when compared to the theoretical aspects. The usefulness of a book, which contains scientific ideas, can only be judged by results. In this book is a list of some hundreds of balanced chemical equations as well as chemical formulas with their IUPAC nomenclatures. It also contain names of chemical elements with their properties, date of discovery, name of discoverer and some interesting facts about them. This book would be most useful to the following categories...
