Tabletop Academy Press, United States, 2015. Paperback. Book Condition: New. 214 x 149 mm. Language: English . Brand New Book ***** Print on Demand *****. Math Your Kids WANT To Do Are you tired of the daily homework drama? Do your children sigh, fidget, whine, stare out the window -- anything except work on their math? With the Math You Can Play series, your kids can practice their math skills by playing games with basic items you already have around the house, such as playing cards and dice. Counting Number Bonds features 21 kid-tested games, offering a variety of challenges for preschool and early-elementary learners. Young children can play with counting and number recognition, while older students explore place value, build number sense, and begin learning the basics of addition. Chapters include: Early Counting: Practice subitizing (recognizing small numbers of items at a glance) and learn the number symbols. Childhood Classics: Traditional folk games invite the whole family to enjoy playing with math. Number Bonds: Build a mental picture of the relationships between numbers as you begin to explore addition. Bigger Numbers: Develop familiarity with two-digit numbers and promote strategic thinking skills. Math games pump up mental muscle, reduce the fear of failure, and generate a positive attitude toward mathematics. Through playful interaction, games strengthen a child's intuitive understanding of numbers and build problem-solving strategies. Mastering a math game can be hard work, but kids do it willingly because it is fun. If you are a parent, these games provide opportunities to enjoy quality time with your children. If you are a classroom teacher, use the games as warm-ups and learning center activities or for a relaxing review day at the end of a term. If you are a tutor or homeschooler, make games a regular feature in your lesson plans to build your students' mental math...
