# Formal Modeling and Analysis of Timed Systems

Filesize: 2.2 MB

Reviews

It in one of the most popular publication. We have read through and that i am sure that i will likely to study again once more later on. I am just delighted to tell you that this is actually the finest publication we have read through in my individual existence and might be he best pdf for actually.
(Mr. Cloyd Schmidt II)

FORMAL MODELING AND ANALYSIS OF TIMED SYSTEMS

Springer-Verlag Gmbh Sep 2010, 2010. Taschenbuch. Book Condition: Neu. 239x155x15 mm. Neuware - This volume contains the papers that were presented at the 8th International Conference on Formal Modeling and Analysis of Timed Systems (FORMATS 2010), held September 8-10, 2010, at IST (Institute of Science and Technology) Austria, in Klosterneuburg, Austria. The modeling andanalysis oftiming aspects of systems is a keyproblem that has been treated independently in several di erent communities in computer science and related areas. Researchers interested in semantics, veri cation, re-timescheduling,andperformanceanalysisstudymodelssuchastimedautomata and timed Petri nets, the digital design community focuses on propagation and switching delays, and designers of embedded controllers need to take into - count the time requiredby controllersto compute their responses after sampling the environment. Although the timing-related questions in these separate c- munities have their own speci c nature, there is a growing awareness that there are basic problems that are common to all of them. In particular, all of these disciplines model and analyze systems whose behavior depends on combinations of logical and timing constraints between occurrences of events. The aim of FORMATS is to promote the study of fundamental and practical aspects of timed systems, and to bring together researchers from di erent d- ciplines that share an interest in the modeling and analysis of timed systems. Typical topics include (but are not limited to): - Foundations and Semantics: theoretical foundations of timed systems and languages; comparison between di erent models (timed automata, timed Petri nets, hybrid automata, timed process algebra,max-plus algebra, pr- abilistic models). 257 pp. Englisch.
